

## Associate - Cloud Infrastructure and Services Version 4.0

### Certification Description

[Proven Professional Website](#)

Engage with your peers in our [Proven Professional Community](#)

#### Certification Overview

This certification benefits anyone who needs to design and manage cloud services or architect cloud infrastructure to host the services. The certification supports the skills needed to successfully work within organizations undergoing digital and IT transformations. This associate certification (DCA-CIS) is part of the Cloud Architect track and qualifies the learner for several Specialist-level certifications.

#### Certification Requirements

To complete the requirements for this certification you must:

Pass the following Associate level exam on or after August 05, 2022.

- [DEA-2TT4 Cloud Infrastructure and Services Version 4 Exam](#)

Note: These details reflect certification requirements as of 08/05/2022.

The Proven Professional Program periodically updates certification requirements. \*Please check the [Proven Professional CertTracker](#) website regularly for the latest information and for other options to meet the Associate level requirement.

**Dell Technologies Partners:** Achieving a certification validates capability; however, it does not imply authorization to deliver services. Services Delivery Competencies provide partners with the ability to deliver services under their own brand or co-deliver with Dell Technologies. Tiered partners are eligible to obtain services delivery competencies upon completing the specific requirements outlined in the [enablement matrix](#). Only partners that have met these requirements should be delivering their own services in lieu of Dell Technologies Services.

#### Other Certification Recommendations

This certification will qualify towards the following Specialist level certifications in the Dell Technologies Proven Professional Program.

- [Specialist - Cloud Architect, Cloud Infrastructure Version 3.0](#)
- [Specialist – Implementation Engineer, ECS Version 1.0](#)
- [Specialist – Systems Administrator, ECS Version 1.0](#)
- [Specialist – Systems Administrator, VxRail Version 2.0](#)
- [Specialist – Implementation Engineer, VxRail Version 2.0](#)
- [Specialist – Systems Administrator, VxBlock Version 2.0](#)
- [Specialist – Implementation Engineer, VxBlock Version 2.0](#)
- [Specialist – Infrastructure Security Version 1.0](#)

## DEA-2TT4 Cloud Infrastructure and Services Version 4 Exam

### Exam Description

#### Overview

This exam is a qualifying exam for the **Associate - Cloud Infrastructure and Services Associate (DCA-CIS)** certification.

This exam focuses on building cloud infrastructure based on a cloud computing reference model. It includes various aspects of cloud such as applications, cloud services and orchestration, modern infrastructure (physical, virtual, and software-defined infrastructure), business continuity, security, and service management that are essential for building a cloud infrastructure. This exam also focuses on the comprising technologies, components, processes, and mechanisms for each of these functions. A limited number of questions refer to product examples that are used in the training to reinforce the knowledge of technologies and concepts.

Dell Technologies provides free practice tests to assess your knowledge in preparation for the exam. Practice tests allow you to become familiar with the topics and question types you will find on the proctored exam. Your results on a practice test offer one indication of how prepared you are for the proctored exam and can highlight topics on which you need to study and train further. A passing score on the practice test does not guarantee a passing score on the certification exam.

#### Duration

90 Minutes  
(~60 Questions)

**Pass Score:** 60%

#### Practice Test

Exam - [DEA-2TT4](#)

#### Exam Topics

Topics likely to be covered on this exam include:

##### **Digital Transformation, Cloud Computing Reference Architecture, and Introduction to Cloud Computing (9%)**

- Describe digital transformation, business and IT challenges, IT transformation key focus areas, and enablers of digital transformation
- Describe essential characteristics of cloud computing, cloud service models, and cloud deployment models
- Describe cloud reference architecture

##### **Application, Cloud Services, Orchestration, and Modern Infrastructure (32%)**

- Describe the need for application transformation, approaches of application transformation, and characteristics of modern applications
- Explain cloud service functions, portal, service lifecycle, automation, and orchestration
- Distinguish between physical, virtual, and software-defined infrastructure, and infrastructure deployment options

**Dell Inc.**

In North America  
1-866-464-7381

**Cloud Security and Business Continuity (37%)**

- Describe security threats and security control mechanisms
- Explain the role of GRC
- Describe business continuity and fault tolerance mechanisms
- Describe data protection solutions

**Cloud Service Management and IT Transformation (22%)**

- Summarize service management functions, cloud service portfolio, and operation management
- Describe the key focus areas of transforming IT

The percentages after each topic above reflects the approximate distribution of the total question set across the exam.

### Recommended Training

The following curriculum is recommended for candidates preparing to take this exam.

**Please complete one of the following courses:**

Course Title	Course Number	Mode	Available
Cloud Infrastructure and Services v4	ESDTFD00629	On-Demand Course-Self Paced	7/22/2022
Cloud Infrastructure and Services v4	ESDTFS00270	Classroom/Virtual Classroom	7/22/2022
Cloud Infrastructure and Services v4	ESDTFP04447	Private Classroom	7/22/2022

Note: These details reflect exam content as of August 5, 2022.

The Proven Professional Program periodically updates exams to reflect technical currency and relevance. Please check the Proven Professional website regularly for the latest information.
