Overview

This exam is a qualifying exam for the **Expert - Cloud Architect, Cloud Services** certification.

This exam focuses on knowledge and skills necessary to plan, design, and manage, robust cloud services in a cloud environment. It tests the ability of technology professionals to design services which transform business operations and cloud environments, incorporating the governance, organizational, financial, and technology aspects as well as the management and operation of cloud services.

Dell Technologies provides free practice tests to assess your knowledge in preparation for the exam. Practice tests allow you to become familiar with the topics and question types you will find on the proctored exam. Your results on a practice test offer one indication of how prepared you are for the proctored exam and can highlight topics on which you need to study and train further. A passing score on the practice test does not guarantee a passing score on the certification exam.
