Overview

This exam is a qualifying exam for the **Specialist - Implementation Engineer, PowerEdge MX Modular** track.

This exam focuses on installing, implementing, administering and troubleshooting the Dell EMC PowerEdge MX server products.

Dell Technologies provides free practice tests to assess your knowledge in preparation for the exam. Practice tests allow you to become familiar with the topics and question types you will find on the proctored exam. Your results on a practice test offer one indication of how prepared you are for the proctored exam and can highlight topics on which you need to study and train further. A passing score on the practice test does not guarantee a passing score on the certification exam.
