Overview

This exam is a qualifying exam for the **Specialist - Implementation Engineer, VMAX All Flash and VMAX3 Solutions (DCS-IE)** track.

This exam focuses on configuration and business continuity management of VMAX All Flash and VMAX3 storage arrays in open systems environments. Non-disruptive migration (NDM) to VMAX All Flash and VMAX3 arrays is also covered. Managing configuration changes, TimeFinder SnapVX, SRDF, and NDM using SYMCLI and Unisphere for VMAX is assessed.

Dell Technologies provides free practice tests to assess your knowledge in preparation for the exam. Practice tests allow you to become familiar with the topics and question types you will find on the proctored exam. Your results on a practice test offer one indication of how prepared you are for the proctored exam and can highlight topics on which you need to study and train further. A passing score on the practice test does not guarantee a passing score on the certification exam.

Products

Products likely to be referred to on this exam include but are not limited to:

- VMAX All Flash and VMAX3 with HYPERMAX OS 5977 Q3 2016 Service Release
- Solutions Enabler 8.3
- Unisphere for VMAX 8.3
- SYMCLI
- TimeFinder SnapVX
- SRDF
- Open Replicator
- Non-disruptive Migration

Exam Topics

Topics likely to be covered on this exam include:

Local and Remote Replication (6%)

- TimeFinder SnapVX architecture, features, capabilities, benefits, and management
- SRDF architecture, features, capabilities, benefits, and management
- Open Replicator architecture, features, capabilities and management

Business Continuity Management (31%)

- TimeFinder SnapVX operations with SYMCLI and Unisphere for VMAX
- SRDF operations in synchronous (SRDF/S) and asynchronous (SRDF/A) modes using SYMCLI and Unisphere for VMAX
