OVERVIEW

In this course, attendees will receive hands-on training on the latest techniques for understanding textual input using natural language processing.

COURSE OUTLINE

You will learn how to:

• Classify words to accurately understand their meaning
• Handle factual queries and their semantic meaning
• Train machine translators from one language to another

On completion, you will be able to use natural language processing using neural networks in any application.

MODALITIES

This course is currently available in the following formats:

Classroom
Traditional classroom training, with hands-on labs or case-studies, delivered at one of our many training centers worldwide, by a highly qualified Dell Technologies instructor.

Virtual Class
A real-time interactive training experience where students participate online to access the Classroom virtual classroom. Lecture, discussion, questions and answers, and lab exercises make this a rich and flexible training experience.
