#### Overview

This exam is a qualifying exam for the **Specialist - Implementation Engineer, Avamar (DCS-IE)** track.

This exam focuses on ensuring individuals are knowledgeable in Avamar concepts and terminology. The exam requires the successful candidate to demonstrate the knowledge required to implement and configure an Avamar backup solution in single and multi-node environments. This exam covers Avamar Concepts, Avamar Implementation, and Avamar Administration. The exam also covers the Cloud Tier solution, the Avamar Fitness Analyzer, and integration of Avamar with Data Domain and NDMP.

Dell Technologies provides free practice tests to assess your knowledge in preparation for the exam. Practice tests allow you to become familiar with the topics and question types you will find on the proctored exam. Your results on a practice test offer one indication of how prepared you are for the proctored exam and can highlight topics on which you need to study and train further. A passing score on the practice test does not guarantee a passing score on the certification exam.

#### Products

Products likely to be referred to on this exam include but are not limited to:

- Avamar v19.2 software
- Avamar Data Store Gen4T
- Avamar Virtual Edition v19.2
- Avamar NMDP Accelerator

#### Exam Topics

Topics likely to be covered on this exam include:

##### Avamar Concepts (18%)

- Identify use cases where Avamar can be used
- Give examples of how to use Avamar to address the use cases
- List Avamar features and capabilities
- Describe Avamar system architecture and components
- Explain the key concepts required to administer and use Avamar

##### Avamar Implementation (13%)

- Explain Avamar Virtual Edition solution
- Understand the prerequisites for Avamar Installation and Upgrade
- Explain Avamar Installation procedures, best practices, and understand licensing options
- Explain Avamar Upgrade procedures and best practices

##### Avamar Installation and Maintenance (24%)

- Describe Avamar Data Store (ADS) solution
- Install Avamar Data Store hardware
- Explain the node replacement and node addition processes
- Summarize how to connect Avamar Data Store to the customer network

#### Avamar Administration (45%)

- Identify Avamar tools for system monitoring, maintenance, and capacity management
- Navigate through the Avamar Web User Interface (AUI)
- Configure and perform backups and restores
- Configure and run Avamar replication solutions
- Configure and run Cloud Tier solution
- Identify best practices for configuring an Avamar backup environment
- Explain and conduct Avamar server daily maintenance activities
- Explain Avamar Fitness Analyzer and its functionalities
- Integrate Avamar with Data Domain and NDMP

The percentages after each topic above reflects the approximate distribution of the total question set across the exam.
