Customer challenges

Organizations across the globe share a common challenge: how to efficiently train IT teams with the skills they need to achieve business outcomes. This challenge is further amplified when IT teams have differing skills and time constraints, and are based in various locations. Additionally, users require access to the right content at the right level of expertise, at the right time, which can be vital to the success of your VMware solutions.

Digital learning is the future of IT training

The VMware Enterprise Learning Subscription™ (ELS) is a comprehensive digital learning solution from VMware Customer Connect Learning™ with the latest digital content developed exclusively by VMware certified experts. ELS helps IT organizations and teams gain the knowledge, skills and validation for continued success, anytime, anywhere.

Many companies leveraging ELS within their teams begin with a Knowledge Skills Assessment (KSA) that provides actionable insights to address gaps in IT skills and optimize your VMware investments. It can provide individual learning paths that can be fulfilled through ELS.

VMware Customer
Connect Learning™

All On Demand
and VMware Lab
Connect™ courses

Individual
certification exam
prep courses

Two VCP exam
vouchers per
subscriber

The Enterprise Learning Subscription platform offers a video-driven user experience, creating an environment for exciting and engaging learning. With a new and simplified search and navigation engine you can quickly and easily find information by VMware product, skill level, groups or certification.

On Demand courses offer the same in-depth instruction and content as the instructor-led courses offered by VMware Learning and qualifying courses meet eligibility requirements for relevant certifications. With engaging recorded videos, these courses span every aspect of VMware technologies—from design to implementation.

ADDITIONAL VALUE-ADDED FEATURES

- Immediate access to new, frequently added content
- No additional charge for new content added throughout your subscription term
- Multi-year subscription packages are available upon request for uninterrupted service with the ability to add or change subscription users each year

Access to featured learning paths and On Demand content

Individual users can explore learning paths based on our full-length On Demand courses, which are equivalent to instructor-led offerings.

The screenshot shows the VMware Customer Connect Learning interface. At the top, there's a search bar and a shopping cart icon. Below it, a section titled "Featured Learning Paths" displays four cards: "VMware Workspace ONE: Design [V20.x] - ...", "VMware Workspace ONE: Deploy and...", "VMware Horizon 8: Deploy and Manage - On...", and "VMware Horizon 8: Infrastructure Administration - ...". Below this, a specific course titled "VMware Horizon 8: Deploy and Manage - On Demand" is highlighted. This course card includes a thumbnail, the title, a brief description, and a "View Details" button. To the right of the course card, there's a sidebar for "Enterprise (ELS)" with sections for "VMware NSX-T Data Center Troubleshooting", "Technical: Hyperconverged Infrastructure", and "5 Courses".

Interactive elements for your team

Encourage your team to get involved in community activities, such as polls, live webinars, forums and instructor hours.

The screenshot shows three interactive elements. On the left is a "Poll" card with the question "Which solution track are you planning on earning your next certification in?". It lists several tracks: "Data Center Virtualization", "Cloud Management & Automation", "Network Virtualization", "Digital Workspace", "Security", and "App Modernization". A "Save" button is at the bottom. To the right are two "Webinar" cards. The first webinar card is for "Migrate NSX-V to NSX-T to extend Power..." and shows a start date of Jun 10 2021 8:30 AM PDT. The second webinar card is for "Protect Your Apps and Data with Intrinsic..." and shows a start date of Jun 17 2021 5:00 AM PDT.

Focused on your business outcomes

Your success starts on the first day of your subscription. One of our customer success experts will support new users through the onboarding process.

We will help:

- Pre-register all your designated team members
- Provide onboarding to help new users navigate Connect Learning
- Offer best practices and helpful tips for getting the most out of ELS

After your IT team members are onboarded, a live chat and community forums will be available to answer questions and help find the right level of content. Individualized learning paths that cater to participant skillsets and desired organizational objectives can also be recommended. We can also provide consumption metrics to your organization to demonstrate the subscription's utilization across your team members.
